

Polyolefin heat shrink tubing

Polyolefin heat shrink tubing is a general, flexible heat shrink tubing which can be used for a wide range of applications, including military and professional electronics. Standard applications are insulation, mechanical protection and marking.

Polyolefin heat shrink tubing is available in black, white, red, blue and yellow colour or transparent. Other colours available on request.

Key properties Polyolefin heat shrink tubing

- Shrink Ratio 3:1
- Shrink temperature <100 ° C (except transparent, 3 " and 4" :> 100 ° C)
- Self-extinguishing (colours only) / Cadmium-free tubing
- Durable
- Working temperature -55°C to 135°C

Ratio 3:1

Dim. mm	ID before shrink mm	ID after max. shrink mm	Wall thickness after max. shrink mm
1.50	1.50	0.50	0.45
3.00	3.00	1.00	0.55
6.00	6.00	2.00	0.65
9.00	9.00	3.00	0.75
12.00	12.00	4.00	0.75
18.00	18.00	6.00	0.85
24.00	24.00	8.00	1.00
39.00	39.00	13.00	1.15

The above mentioned dimensions and tolerances are our standard.
Other dimensions and/or tolerances available on request.
