

# PTFE tape, type SPF

*Type SPF is a virgin PTFE skived foil with a very smooth surface with a self-adhesive silicone adhesive layer on one side covered with a release liner. This tape is widely used and due to the stretch feature especially suitable for coating of sharp bends, for which PTFE fiberglass is not suitable.*

*Type SPF is standard available in rolls of 30 mtr, in various thicknesses and widths. The most common thicknesses are 0,15 mm/0,25 mm and 0,50 mm. The standard colour of PTFE tape is natural/white. Our sales engineers are at your service when you want to determine the right formula for your application.*

## Possibilities

SPF13, thickness 0.13 mm  
SPF25, thickness 0.25 mm  
SPF50, thickness 0.50 mm

Type	Nominal thickness mm	Application	Remarks
SPF-08	0,08	skived PTFE foil	adhesive
SPF-10	0,10	skived PTFE foil	adhesive
SPF-13	0,13	skived PTFE foil	adhesive
SPF-25	0,25	skived PTFE foil	adhesive
SPF-50	0,50	skived PTFE foil	adhesive
SPF-75	0,75	skived PTFE foil	adhesive

The above mentioned types are our standard.
