

Viton heat shrink tubing

Viton heat shrink tubing is very suitable for applications requiring high temperature and fluid resistance.

Viton heat shrink tubing can withstand fuels, most hydraulic fluids and other chemicals at a continuous working temperature of 200°C.

Standard colour is black, other colours available on request.

Key properties Viton heat shrink tubing

- Shrink Ratio 2:1
- Shrink temperature > 175 ° C
- Self-extinguishing/Cadmium-free tubing
- Very flexible
- Working temperature -55°C to 200°C

Ratio 2:1

Dim. inch	Dim. mm	ID before shrink mm	ID after max. shrink mm	Wall thickness after max. shrink mm
1/8"	3.20	3.20	1.60	0.80
3/16"	4.80	4.80	2.40	0.90
1/4"	6.40	6.40	3.20	0.90
3/8"	9.50	9.50	4.70	0.90
1/2"	12.70	12.70	6.40	0.90
3/4"	19.10	19.10	9.50	1.10
1"	25.40	25.40	12.70	1.40

The above mentioned dimensions and tolerances are our standard.
Other dimensions and/or tolerances available on request
